

It is my understanding that a new broadcast service known as LPFM may be used in lieu of an FM translator to broadcast K-LOVE, 106.7 in Raleigh/Durham, NC area. Please reconsider this option due to the fact that K-LOVE is the only station that I and several of my friends listen to and support. It is comforting to know that I can hear uplifting tunes and not have to worry about the profanity and racial/off color jokes from the d.j.'s and/or vulgar music being played. If this new LPFM must be used, please consider using it on the stations that broadcast the vulgar and profane language and music that children, mine and others, do not need to be hearing on the radio, since they hear enough of it in school, on television, and on the streets and playgrounds. K-Love is a great station that has been around for 23 years and should not have to worry about their listeners/supporters not being able to listen to good, clean, and spiritual broadcast.
